

**NJDEP-EPA Joint Priorities  
SFY 2017 – 2019 Performance Partnership Agreement**

- Support the Clean Air Strategy for the Port of Newark and Elizabeth
- Continue participating in the Camden Collaborative Initiative
- Continue to engage in a number of marine debris prevention activities (e.g., Clean Shores program, CSO and stormwater initiatives, Clean Marinas) and to participate in the regional Trash Free Waters Partnership
- Continue to share information with EPA on the Development of NJ's efforts related to its implementation of Disaster Debris Management Planning
- Continue to communicate with EPA on NJ's evaluation of the Re-TRAC Connect integrated, web-based information management platform and desire to utilize this partially EPA-funded system
- Undertake pollution prevention activities to reduce the potential for toxic substance releases from businesses in urban environments subject to extreme weather events
- Undertake pollution prevention activities geared toward increasing the environmental and economic sustainability of the hospitality sector
